### Big Damages Asked By Toronto Broker

Found New City of Being Chiropractic—Arrested at St. Louis

NEW YORK, Feb. 1.—Damages to Toronto \$10,000 were asked of two real estate firms in civil suits filed in the State Supreme Court here today by Alexander R. McCleary, Toronto insurance agent, who was arrested a year ago in St. Louis on being charged with fraud, wanted for forgery. The case was continued one of the most noted instances of mistaken identity on the part of McCleary having been established that he was not Knoch.

McCleary, his wife, his arrest and detention in St. Louis, and the arrest of his wife, were caused by the arrest of an individual of representatives of Thompson, B. Starr, Inc., in New York and Brooks Brothers, Inc., in New York, McCleary in his complaint demands \$10,000 of the first concern and one half that sum of the second.

The crime for which McCleary was held involved the forging of checks on the firm which owned the property.

## SHOOT TO KILL AND STARVE THE STRIKERS

German Government is Resolved to Crush Strike at All Hazards—Public Meetings Prohibited—Troops Will Shoot to Kill if Crowds Persist—Starving Strikers

AMSTERDAM, Feb. 2.—Germany is ready to "shoot to kill" as a final desperate means to put down the general strike, and "to shoot to kill" as a starving strike. The announcement supplemented the proclamation of the supreme command, forbidding all public meetings throughout Germany.

"Everyone must quietly carry out their duties and avoid forming crowds," declared the statement. "It must be made clear, however, that no distinction will be made between strikers and others."

The official proclamation prohibiting public meetings reads: "Having introduced a more drastic state of siege regulation, we intend to spare every attempt to disturb the peace or order, by all means at our disposal. We therefore warn every orderly citizen not to participate in any public meetings."

PLAN TO STARVE STRIKERS

COPENHAGEN, Feb. 2.—Hunger is the latest weapon turned against the German strikers, to force them into submission. It is believed here. Trade union leaders in that country, hoping to the will of the militaries, are said to have turned against the strikers, withholding strike benefits in the hope of starting the protesting workers into acknowledgment of defeat. This information was contained in dispatches received here today. It was further stated that while there are no riots in Berlin, many disturbances continue in the suburbs.

ALLEGED INSULT TO FRENCH CANADIANS

QUEBEC, Feb. 2.—An action the like of which has probably never before been taken in civil courts, was instituted today in the Superior Court. Mr. Alphonse Demers, of Quebec City, has entered a writ for \$100 against one Patrick Ryan, a railroad engineer, whom Demers charged with insult and assault on the streets of Quebec. Ryan, a public figure, had been charged with insult and assault on the streets of Quebec. Ryan, a public figure, had been charged with insult and assault on the streets of Quebec.

## Bourassa Wants Peace And That Quickly

Dire Consequences, if Allen Do Not Quickly End the War

MONTREAL, Feb. 2.—Henri Bourassa, in his weekly, avers that if the Allies are beaten and that peace is near at hand.

"The recent declarations of Lord Balfour," he says, "reveal the gravity of the situation in which, while it may seem the case that Italy is at the end of her resources and France is drifting from her last reserves, in fact, if the Government do not hasten to conclude peace with the starving people, it will be a disaster."

Bourassa asserts that it is, consequently, the duty of the Government to take a decisive step in order to avert the shock of the two forces meeting, which would result in a civil war, if not a general war.

## Mr. O'Connor Still Sticks To His Guns

May Give Out Names of Firm Who Are Keeping Up Egg Prices

OTTAWA, Feb. 2.—The details of the situation in Montreal, Toronto, Ottawa and elsewhere that, day after day, are accumulating, are such as to be referred to by the name of "Hog Country." O'Connor, brought back from that "other" day a revelation of his own.

"I do not refer to dealers," he says, "who have got down to their knees, but to the dealers who are in the business of selling eggs. They are in the business of selling eggs, and they are in the business of selling eggs."

The Provincial Government records of loan companies show that at the end of 1916 the companies in Ontario amounted to \$20,275, whereas those in Quebec amounted to \$1,011,111. "This," says O'Connor, "is a very large sum of money."

As the assets of the company are considerably in excess of liabilities to the public, it would appear that the company is in a position to realize on its assets. The company is in a position to realize on its assets.

## Reduced Prices on Melting Stocks of Canadian Rye Whiskies.

The good old Canadian Rye Whiskies are melting fast. They are as good as every-backed by the high reputation of their makers and the Dominion Government's Excise stamp on each bottle guaranteeing their age and purity.

As the distillers have been prohibited from making any more, we strongly advise our customers to secure their requirements quickly. Owing to the Canadian distillers not having increased their selling prices since the Government passed their order-in-council on December 22nd, prohibiting the importation into Canada of Wines and Liquors, we are still in a position to quote the best prices. These prices are subject to change daily—they may go up, or they may go lower—no advance or reduction will be made upon orders received and shipped at prices quoted. We sell goods upon a fair and reasonable profit—no bait.

### OSHAWA BEAT BELLEVILLE.

At Oshawa last night an international O.H.A. match took place between the Belleville speedy team and the Oshawa team. The latter team was filled with hockey enthusiasts, who were privileged to witness a good game. The result was a win for Oshawa by a score of 10 to 7. Both teams were in fine condition and the game was full of vim from start to finish. In the first period Oshawa scored 3 goals and Belleville 2. The second period ended 10 to 2 in favor of Oshawa, and the final period put Oshawa in front 10 to 7. This time Oshawa with Belleville for group bonus. The lineup was as follows:

Belleville—Goal, Hollis; right defense, Green; left defense, Hagmann; centre, Whelan; right wing, Symons; left wing, Whelan.

Oshawa—Goal, Childs; right defense, Horvath; left defense, Horvath; centre, Howden; right wing, Horvath; left wing, Jansen.

Belleville—The checking was close and hard, but the game was not unduly rough. The small ice surface and dead side boards helped the Belleville players somewhat, who are expected on ability and form to romp away from Oshawa. The players on Belleville.

"BRINGING UP FATHER ABROAD." George McManus' latest, cartoon musical sensation which comes to Griffin's Opera House next Thursday night.

## Music and Drama

"BRINGING UP FATHER ABROAD" PAULINE FREDERICK and CHARLIE CHAPLIN

What is said to be a brilliant success in "BRINGING UP FATHER ABROAD," the latest offering of the famous George McManus musical comedy series, is the most successful musical comedy yet produced.

Every "Lover" in the land has heard of "Lover's Luck," the father of the musical comedy series, just as every reader of the comic contains of the adventures of the country has heard of the newspaper of the family as shown in the cartoon. Interpreted with incidental music, which the dance that keep the feet tapping and comedians and girls that never permit a dull moment. "Bringing Up Father Abroad" is pronounced the funniest of all the series. The new production comes to Griffin's Opera House, next Thursday night, Feb. 15th.

### VIRGINIA PEARSON IN

"WRATH OF LOVE" Photo for farces and this "Bringing Up Father Abroad" is the first descriptive work of the American comic series. The series of Virginia Pearson's latest production for William Fox, "Wrath of Love," always on the double quick. This epicomic musical drama will be shown at the Palace this Monday to Wednesday, matinee daily. Round Wines, the role played by Miss Pearson, is a well known author. She carries a keen business man and is very happy when a girl friend is placed in her husband's arms by Dave Blake, her father, who is called to the front. Virginia Pearson, arising from perfectly innocent situations which she understands, works her caprice and she is only saved from a desperate act by Blake's return.

"The Fighting Trail" and a selection comedy will also be presented.

### MIRIAM COOPER and CHARLIE CHAPLIN

Miriam Cooper appears at the Palace tonight in the William Fox production, "Bringing Up Father Abroad," a charming, hilarious play, which she heartily enjoys. She is called to the front. Virginia Pearson, arising from perfectly innocent situations which she understands, works her caprice and she is only saved from a desperate act by Blake's return.

Witley Camp, C/o A. P. O.

Dear Captain Marjorie:

I now take great pleasure in

writing you a few lines in answer to your

most welcome letters which I received

today and was glad to hear from

you. I am well and hope this will find you

all the same. Well, Marjorie, I got

letter from you and your mother

dated in November and another one

dated in December. I have just got

back of my six days pass this morn-

ing at eleven o'clock and after

looking back there were twenty-five

days waiting for me. I got five from

back dated back in Nov. 1918, so

you can see how long it takes

before mail can travel. It is terrible

how long it takes. Well, how do

you spend Christmas? I hope

you had a fine time. I had a fine time

here, but I could have had better if

I had been at home. I went to

Gaulthier in the afternoon and eve-

ning. Well, I will tell you something

of my travels on leave. We were

with I and another officer, last Fri-

day morning and left in London at

ten o'clock. There we spent the rest

of the day until 10:30 a.m. Then

we left King's Cross station for Kil-

nare, after travelling all night we

were there at 9 a.m. We spent all

day Saturday and Sunday there and

took the train for Glasgow at 9:30

a.m. It was about 10:30 a.m. when

I was in Glasgow and I spent

two days there taking in the sights.

I have been very busy since I came

back, as I am in the line and I am

very busy with my work. I am

**Announcing  
the new  
bigger  
Comfort bar**

The Comfort Soap bar is now much larger. It's the same soap  
absolutely, but we are giving you a bigger bar for the same money.  
We do this because we are withdrawing all premiums as it is now  
impossible to get satisfactory premium goods owing to the war.

### No Premiums -but more Soap

Dozens of factories from which we used to buy premiums are now making  
more necessary war supplies. Others again cannot ship, being across the  
ocean. The new premiums being offered us are away under Comfort Soap  
standards so when our present stock is exhausted we will not issue any more  
—certainly not until after the war.

But we can still buy the splendid materials that go into Comfort Soap, so we have  
decided to make the Comfort bar materially bigger, right away. There's where we can give  
you the same, old splendid-quality soap—only more of it.

We can't give you good Premiums but we can make it up to you in Soap.

All Comfort wrappers now out in the stores will be redeemed as heretofore but the  
wrappers of the new big bars of Comfort bar will not  
be good for premiums.

You will meet the bigger Comfort bar any day now  
at your grocer's. Give it a friendly reception.  
It means more value in the wash tub. For a while  
yet you may be getting the old bar—it's just as  
valuable, the wrapper being still good for premiums.

Enormously the largest sale in Canada.

# Introducing the Ford One-ton Truck!

To all business men who have hauling or delivery problems to consider, whether operating a department store, grocery or farm, the announcement of a one-ton truck, manufactured by the FORD MOTOR CO., LTD., will be welcome.

Motor transportation has many advantages. Speed is an important item in delivery service. One motor truck can do the work performed by several horse-drawn deliveries. Motor delivery service has proved to be cheaper than the use of horses, to say nothing of the better service to customers.

You can now get a FORD one-ton truck. This means you can buy a serviceable car of one ton carrying capacity and which embodies the desirable qualities of FORD sturdy construction and low up-keep expense.

The frame is built of heavy steel. The wheel base has been lengthened to 124 inches. A worm drive rear axle system is used, geared down sufficiently to provide ample power for transporting the load at a moderate speed.

The worm gear has many advantages for truck service. It permits the use of a low gear reduction without the loss of power and without excessive noise or friction. There are no chains to stretch and ride on sprocket teeth with loss of power and exposure to dust. The worm gear is entirely enclosed and protected.

## SPECIFICATIONS:

**Axles** Front axle of I-beam construction, especially drop-forged from Vanadium Steel, insuring the highest quality of axle strength obtainable. Rear axle also of Vanadium Steel, and enclosed in a tubular steel housing. The differential is of the two-pin type; all gears are drop-forged made of Vanadium Steel.

**Brakes** Dual system. Service brake operates on the transmission and is controlled by foot pedal. Expanding brake in rear wheel drums serves as emergency brake. It is controlled by hand lever on left side of car.

**Carburetor** Floet feed automatic with dash adjustment. Specially designed to give maximum power, flexibility and easy starting, with economy of fuel consumption.

**Clutch** Multiple steel disc, operating in oil.

**Control** On the left side of car. Three foot-pedal controls, low and high speeds, reverse, and brake on the transmission. Hand levers for neutral and emergency brake on left side of car. Spark and throttle levers directly under steering wheel.

**Cooling** By Thermo-Siphon water system. Extra large water jackets and a special Ford vertical tube radiator to permit of a continuous flow of water and prevent excessive heating. A belt-driven fan is also used in connection with the cooling system.

**Final Drive** Is of the worm type, enclosed in a dust and oil-proof housing. Direct shaft drive to the center of chassis; only one universal joint is necessary. A ball and socket arrangement in the universal joint reduces shocks and strains caused by the unevenness of the road.

**Gasoline Capacity** Cylindrical tank of 8 Imperial gallons capacity mounted directly on frame. Lubrication—combination gravity and splash system. Oil is poured into crank case through the breather pipe on the front cylinder cover. All moving parts of motor work in oil and distribute it to all parts of the power plant.

**Magneto** Special Ford design, built in and made a part of the motor. Only two parts to the Ford magneto, a rotary part attached to the flywheel and a stationary part attached to the cylinder casting. No brushes, no commutators, no moving wires to cause annoyance on the Ford magneto.

**Motor** Four-cylinder, four cycle. Cylinders are cast in one block with water jackets and upper half of crank case integral. Cylinder bore is three and three-quarter inches; piston stroke is four inches. The Ford motor develops full twenty horse power. Special Ford removable cylinder head permits easy access to pistons, cylinders and valves. Lower half of crank case, one-piece pressed steel extended so as to form bottom housing for entire power plant—air-proof, oil-proof, dust-proof. All interior parts of motor may be reached by removing plate on bottom of crank case—no "tearing down" of motor to reach crank shaft, cam shaft, pistons, connecting rods, etc. Ford Vanadium Steel is used on all Ford crank and cam shafts and connecting rods.

**Springs** Both front and rear springs are semi-elliptical transverse, all made of specially Ford heat-treated Vanadium Steel. Ford springs are the strongest and most flexible that can be made.

**Steering** By Ford planetary reduction gear system. Steering knuckles and spindle are forged

from special Ford heat-treated Vanadium Steel, and are placed behind front axle.

**Three-Point Suspension** Each of the Ford units is suspended at three points of the chassis. This method of suspension insures absolute freedom from the strain on the moving parts.

**Transmission** Special Ford planetary type, combining ease of operation and smooth, silent running qualities. Clutch is so designed as to grip smoothly and positively, and when disengaged to spring clear away from the drums, thus assuring positive action and maximum power.

**Unit Construction** There are four complete units in the construction of a Ford car—the power plant, the front running gear, the rear running gear and the frame.

**Valves** Extra large, all on right side of motor and enclosed by two small steel plates.

**Wheel Base** Model T Truck has a wheelbase of one hundred and twenty-four inches. The standard tread for all cars is fifty-six inches. Model T Truck will turn in a forty-six foot circle.

**Wheels and Tires** Wooden wheels of the artillery type with extra heavy hubs. Only tires of the highest grade are used on Ford cars. Front pneumatic, 30x3½ inches; rear wheels, hard rubber tires, 32x3½ inches.

**Carrying Capacity** One ton.

**Lubricant for Worm** An A-1 heavy fluid or semi-fluid must be used to lubricate differential in Model T Truck.

Province of Ontario has surplus of \$1,751,374 for the year

McGarry's Pleasing Budget Speech

GREATEST SURPLUS EVER KNOWN IN ONTARIO HISTORY

RESULT OF CAREFUL AND EFFICIENT MANAGEMENT OF HEARST ADMINISTRATION—NO NEW TAXATION NEEDED—BUDGET A STRIKING TRIBUTE TO ABILITY OF PROVINCIAL TREASURER HON. T. W. MCGARRY—

ALL GOVERNMENT DEPARTMENTS SHOW INCREASES

—ONTARIO FINANCES FOR 1916-1917 SHOW LARGEST CREDIT BALANCE EVER—RECEIPTS \$18,299,597—EXPENDITURE \$15,548,222—ALL GOVT DEPTS SHOW INCREASES.

TORONTO, Feb. 13.—Announcing the greatest surplus in the history of the Province, Hon. T. W. McGarry, Provincial Treasurer, introduced his budget in the House yesterday afternoon. In presenting the report of the Government's finances for the fiscal year 1916-17, he said that the ordinary receipts were \$18,299,597, while the ordinary expenditures were \$15,548,222, leaving a net surplus on the year's operations of \$1,751,374-59.

In moving the House into committee of supply, Mr. McGarry gave a brief outline of the finances of the province since the outbreak of the war. In 1913-14 there was a deficit of \$699,928. Mr. McGarry explained that the deficit was partly due to the refusal of certain companies to pay taxes and partly to the fact that \$594,000 had been expended in advances for flour for Great Britain and the Belgian people.

**Increase Year by Year.**

In 1914-15 (the first year of the Hearst Administration) a surplus of ordinary receipts over ordinary expenditures of \$271,370 had been announced.

Last year, when presenting the financial sheet, there was announced "the greatest surplus that had been," namely, \$1,449,974-21.

In his report today Mr. McGarry said the net had been reduced by \$1,449,974-21, and \$155,000 had been expended on capital account, the sum of \$16,154,435-35. "In all," he said, "our total receipts were \$5,000,000, and that we expended over \$5,000,000 out of our ordinary revenues, and the balance carried over from last year."

"Of this sum of \$5,000,000, \$2,500,000 was for Hydro-Electric, \$1,500,000 for T. and N. O. Railway and \$2,000,000 to pay off a loan. So, in the whole, our capital expenditure outside of these particular items was very considerably reduced."

Mr. McGarry pointed out that in the last three years under the leadership of Sir William Hearst, the Government had a surplus to its credit amounting to \$13,571,374-59.

## CRISP COMMENT

If you want to no tomorrow you had better start today to picture.

Anger interested in the production of post can get valuable data on the subject by writing to the Conservation Commission at Ottawa for a look on the subject which will be furnished free.

Queen's popularity is almost everywhere that of the whole Dominion. She has supplied one out of ten of the draft called up. Plainly, our star province is not doing her share in supplying any better than she should do for a military system was to require the nation to supply.

A delegation from the Ontario Motor League is to meet the Board of Control today to ask that all vehicles be required to carry lights at night within the bounds of the municipality. The City Council has been asked to pass and enforce such a law, and an insurance against accident is thought to be so. Drivers of automobiles are held to account for running into lives and property at night. To those drivers have lights unprovided with a light are practically visible at night—Toronto Mail and Empire.

The slippery walks Monday and Tuesday added nothing to the perils of winter walking and the middle of the road was well patronized. The municipal staff brigade seemed to be in as good a position as the city, but will have their day when they are advertised by contract. The city press that this class of entertainment draws the largest audience, and no matter how poor the show, it is, in fact, at least one of the same people many of whom would not spend the same amount of money to see a play which brought little excitement and no interest.

It has been proved time and again that the brain child of the artist can not be transferred from the printed page to the theatre stage without a vast amount of deterioration. The so-called cartoon comedy is proof of this, but will have their day when they are advertised by contract. The city press that this class of entertainment draws the largest audience, and no matter how poor the show, it is, in fact, at least one of the same people many of whom would not spend the same amount of money to see a play which brought little excitement and no interest.

### WHAT JESUIT FATHER SAYS

Quebec Seminary May Give Some of Its Courses Because of M. A. D. Decline.

Montreal, Feb. 11.—"Most unfortunate and disastrous," said a Jesuit Father at the "Jesuit College" at Quebec, is the decline in the number of students in the seminary. The more he has practiced these studies in training the more automatically will be performed when his life depends upon their execution. Aerial acrobatics are a necessary part of the training of an aviator. It is unfortunate that Quebec is a toll to human life, but the casualties among our flying men will be no less as great if they were not instructed in what may look to the ordinary spectator as mere games, "showing off."

When the French-Canadian press of the Province of Quebec had exhausted its vocabulary of abuse of Ontario as the abiding place of fanatical bigots who hated Quebec with an all-consuming hate and were no longer bigots but fanatics, it turned to a comparison of morals and in accusing Ontario of being the abiding place of crime came an awful cropper. The *Le Soleil* endeavor, of to prove by statistics that Quebec was a paradise of morality and chaste virtue compared with Ontario, but overlooked the fact that in Ontario law enforcement is strict, while in Quebec it is lax.

### THE MORALITY OF QUEBEC.

While not wishing to take the Pharisee who is to prove by a comparison of criminal statistics between Quebec and Ontario that we are worthy of Canada as a whole, it is not to draw certain facts from these figures. In making the comparison we must remember that the population of Ontario is 4,000,000 while that of Quebec is about 1,000,000. It is to compare four now. Now the total figures of sentences in 1910 show that there were 3,886 in Ontario, 3,124 in Quebec, or in brief, that Ontario had double the sentences which Quebec had. An examination of the details shows that in all the vice crimes Ontario had far more convictions than Quebec. In the matter of juvenile criminals also, Ontario has 1,200 convictions, as against only 600 in Quebec. It is not evident that there is a striking difference between the two provinces? As everybody recognizes that the prevalence of morality is the education of the youth, do not these figures give our neighbors occasion to ask if they should not examine their educational boards. They are not interested in training their system of common schools that they might ask what the results justify their school system.

Alas that *Le Soleil* should have stumbled into this pit with a short time before the report of the Bureau of Municipal Research was made public as to the morality of Montreal. The report already has been published in the news columns, and here is a blast from the Montreal Star which should wake *Le Soleil* out of its false dream of a superiority exclusively confined to the Province of Quebec:

### CRIME.

A city of commercialized crime. A city of organized vice. A city of organized vice. A city of organized vice.

A city where gambling syndicates flourish openly by virtue of license purchased by systematic payments to a corrupt civic official.

A city where organized gangs of crooks and thugs operate with apparent immunity, after having their passports of crime issued by the proper authority.

This is Montreal, according to the report of the Bureau of Municipal Research—a shocking, stunning document that turns like a Zeppelin bomb on the City Hall yesterday.

Much of the revelation of crime slushes and incoherence was anticipated. The report of the Bureau of Municipal Research has been rotten, both in brains and morals, and will be glad that the new administration has been provided with such a sweeping analysis of the situation.

But this official exposure of a corrupt official alliance and the forces that prey upon and plunder them, compels something more than a shrug.

There must be no halting nor hesitation; no shuffling or dodging before the criminal charges presented by the Bureau of Municipal Research.

The whole police force, from the Commissioner down to the next constable, is stained by these charges. Nobody believes that the whole force is crooked. Probably there are great many of all ranks are as honest as the white light of public inquiry and public opinion.

# Those Wonderful Pathe Records

OWE their rich, full, natural  
 tone to two things—a unique  
 and secret method of recording,  
 and their reproduction by means  
 of a round, polished sapphire ball.

It should be evident  
 to all that a ball of  
 sapphire, jeweled  
 under the microscope, and  
 fitted perfectly into

the half-circle of the sound groove,  
 along which it smoothly, beauti-  
 fully glides, is bound to produce  
 a TONE of purity quality that  
 produced by a steel needle that be-  
 comes a jagged kick every time  
 the record has revolved three times.

# Hear these late Pathe Records

Remark the quality—compare them  
 with the same selection of other records and  
 bear in mind that every Pathe record played  
 with the sapphire ball is guaranteed to play at  
 least ONE THOUSAND TIMES. Can you  
 afford to buy any other records?

# CO-OPERATIVE HOG FEEDING.

(By Wm. Brown, Hastings County  
 The Canadian, (Countryman))

The disposal of excrement on those  
 farms has long been a question  
 of some moment, and frequently  
 led to breaking up of large fam-  
 ily units into smaller ones. For over  
 forty years in some of our factories in  
 South Hastings, where the other fam-  
 ily units are still in existence, the mil-  
 lions of co-operatively in pig-breeding  
 and the creation, and it is of this  
 latter method that I wish to write.

A suitable site must first be se-  
 lected, i.e., one sufficient distance  
 from the factory, public highway,  
 dwelling, etc., preferable in an out-  
 erty direction from such places. This  
 site must afford sufficient fall to con-  
 vey the pigs, 20 to 40 cwt in a fairly  
 safe distance.

The construction of the pen is of  
 great importance. They are this  
 buildings, with a large open space  
 away between, which is deep and long  
 enough to receive and hold two weeks  
 or a month's manure. The entire  
 quantity of excrement, all on a level  
 and divided into lots, feed-always  
 very constant, long, plank, always  
 which are connected by gangways, so  
 that the pigs may be driven from  
 where they are kept, a column of  
 which is in the pen. The troughs are  
 about three feet deep, and the  
 are the grain-house, no feeding is very  
 convenient.

The cost of construction is deter-  
 mined by the formation of a plan  
 which company, each member of which  
 otherwise for a pen or just large  
 enough to use up the manure. The  
 size of pen is determined by the num-  
 ber of feet of trough required and the  
 cost of construction is estimated at  
 much per running foot of the trough.

The success of failure of the system

largely depends on the manner of a  
 good reliable hog-keeper—a man who  
 is willing to do all that each man's  
 share of duty. He also has to keep  
 the pigs healthy, and it is sur-  
 prising how many keep one man  
 can look after a whole time each  
 day. We used to feed three times a  
 day, but as good or better results are  
 secured by feeding twice.

The cost of the system is the ad-  
 vantage of when in this way, much  
 can be fed. Of course, there are ad-  
 vantages in a few who assist in the  
 feeding, they admit that, "the factory  
 in the place to feed" some of these  
 advantages are: (1) The pigs are al-  
 ways fresh and in the best condition  
 to give good results; (2) The expense  
 of hauling and injury to cars is  
 avoided; (3) The milk comes to the  
 factory in better condition than when  
 the pigs are transported in the cars,  
 and the pigs are in the best con-  
 dition to give good results.

 advantages are: (1) The pigs are al-  
 ways fresh and in the best condition  
 to give good results; (2) The expense  
 of hauling and injury to cars is  
 avoided; (3) The milk comes to the  
 factory in better condition than when  
 the pigs are transported in the cars,  
 and the pigs are in the best con-  
 dition to give good results.

The success of failure of the system

largely depends on the manner of a  
 good reliable hog-keeper—a man who  
 is willing to do all that each man's  
 share of duty. He also has to keep  
 the pigs healthy, and it is sur-  
 prising how many keep one man  
 can look after a whole time each  
 day. We used to feed three times a  
 day, but as good or better results are  
 secured by feeding twice.

The cost of the system is the ad-  
 vantage of when in this way, much  
 can be fed. Of course, there are ad-  
 vantages in a few who assist in the  
 feeding, they admit that, "the factory

# Youth Killed By A Cake of Ice

Fatal Accident at Thurlow Cheese  
Factory—Brave Boy, the  
Victim.

A most disastrous and sad ac-  
cident occurred this morning at the  
Thurlow Cheese factory, situated in  
the east end of Thurlow town-  
ship, when Ernie Howe, a young man  
about 18, it appears that the  
victim of the accident was standing in  
a hole in the ice because in con-  
nection with the factory, and was stand-  
ing beneath the aperture where the  
ice was being kept. A cake from  
the hole, slipped and fell, striking  
Howe upon the head, killing him. The  
victim had been working about  
20 months. Howe was 17 years of  
age, being a son of Mr. W. Howe whose  
house is in Thurlow township. He was  
a strong, well and healthy  
young man and his untimely death has  
caused much regret in the community  
where he resided. The remains were  
buried to the city and taken to  
Canada & from undertaking establish-  
ment where an inquest was held, ac-  
cording to the coroner Dr. Howe.

# Must Fight To A Finish Must Play Our Part

Says Premier Lenin in Stirring Patriotic Speech Before Ontario  
Legislature—Banner Province Will Do Even Greater Things  
This Year in Patriotic Effort

"On to Berlin," is the cry of the  
men at the front. Let the same be  
our cry. We must fight to a finish  
and we must play our part, that  
which may come upon us as soon as  
the war ends.

With these words, Sir William  
Llewellyn, premier of Ontario, in  
his address to the Ontario legisla-  
ture, declared the unshakable determina-  
tion of the Ontario people to defend  
the rights of the Dominion and of the

## A Useful War Crop

SOME fifteen years ago a farmer in the Pioneer Creek district of Southern Alberta first had the idea of growing timothy. The cultivation of timothy was not always known here, but the value of the crop was not appreciated until that time. The timothy is a grass that not only would be grown successfully, but that the seed was of a superior quality. The growing of it did not differ in any way from a timothy seed. It was, therefore, and it was given to the people of the district. At that time the timothy was like the other crops of the district, with a few exceptions. In the district, it might be mentioned that there are now 175 members of this association in the district.

## Cultivating Timothy

In the production of all kinds of fodder, Southern Alberta is becoming a leader. In the production of timothy, the district is becoming a leader.
